

# SHIVANSH TRIPATHI

Greater Noida, Uttar Pradesh, India | shivanshhere18@gmail.com | +91-7804040872 | linkedin.com/in/shivanshtripathi | github.com/Shivansh-here

## OBJECTIVE

Third-year Information Technology undergraduate with a strong foundation in Java, full-stack development (MERN), and applied AI/LLM integration. Seeking a software engineering role to apply strong problem-solving skills, hands-on project experience, and a growing focus on secure, high-quality development practices.

## EDUCATION

|                                                                                                              |                        |
|--------------------------------------------------------------------------------------------------------------|------------------------|
| <b>Galgotias College of Engineering and Technology</b><br><i>B.Tech, Information Technology   CGPA: 7.55</i> | 2024 – 2028 (Expected) |
| <b>Gurukul Public H.S. School, Panna (MP Board)</b><br><i>Class XII   Percentage: 78.4%</i>                  | 2022 – 2023            |
| <b>Kendriya Vidyalaya, Panna (CBSE)</b><br><i>Class X   Percentage: 87%</i>                                  | 2020 – 2021            |

## TECHNICAL SKILLS

- **Languages:** Java (proficient), Python, C, C++, SQL, JavaScript
- **AI & Modern Tooling:** Prompt Engineering, LLM Integration, Generative AI workflows, AI-assisted development
- **Development:** HTML, CSS, MERN Stack (MongoDB, Express.js, React, Node.js), React Native
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS
- **Tools & Practices:** Git/GitHub

## PROJECTS

### Prahari — Smart Tourist Safety System

*React Native, Node.js, Express.js, MongoDB, Solidity, Socket.IO*

- Built a full-stack tourist safety platform with real-time SOS alerts, live GPS tracking, and hyper-local alerts to improve emergency response times.
- Designed a blockchain-based Digital Tourist ID (Solidity, Hardhat) with DigiLocker identity verification and role-based access for tourists, police, and supervisors.
- Implemented AI-driven geo-fencing and anomaly detection for proactive alerts, using Socket.IO for real-time data transfer between the app and authority dashboard.

### SkillSync — AI-Powered Capability Discovery Platform

*React, Node.js/Flask, MongoDB/Firebase*

- Built an AI platform that aggregates GitHub, LinkedIn, and resume data into an evidence-based capability profile, benchmarked against live job market data using NLP.
- Architected a Node.js/Flask backend integrating the GitHub API to run a 3-way gap analysis comparing self-reported, demonstrated, and market-required skills.
- Built a closed-loop recommendation engine using LLMs to generate targeted micro-projects for high-impact skill gaps, with a job-fit percentage dashboard and PII stripped before any LLM routing.

## ACHIEVEMENTS & LEADERSHIP

### Management Secretary, Fusion Society (Official IT Department Club)

- Lead organizer for technical events, workshops, and departmental activities for a student body of 500+ IT undergraduates.
- Facilitate peer-to-peer learning by bridging the gap between student developers and modern technology stacks.
- Solving Data Structures & Algorithms problems on LeetCode, with consistent daily practice in Java.

## CERTIFICATIONS

- Data Structures & Algorithms in Python: Fundamental Data Structures — Infosys Springboard
- The Complete Data Structures and Algorithms in Python — Infosys Springboard
- Database Administration Workshop (Oracle) — Infosys Springboard
